**NOTICE OF NO AUDITOR REVIEW OF  
CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS**

The accompanying unaudited condensed interim consolidated financial statements of Altai Resources Inc. for the three months ended March 31, 2016 and 2015 have been prepared by the management of the Company and approved by the Company's Audit Committee and the Board of Directors. Under National Instrument 51-102, Part 4, subsection 4.3 (3) (a), if an auditor has not performed a review of the interim financial statements, they must be accompanied by a notice indicating that an auditor has not reviewed the financial statements.

The accompanying unaudited condensed interim consolidated financial statements of the Company have been prepared by and are the responsibility of the Company's management. The Company's independent auditors have not performed a review of these financial statements.

**ALTAI RESOURCES INC.**  
**NOTES TO THE CONDENSED INTERIM CONSOLIDATED FINANCIAL STATEMENTS**  
**FOR THE THREE MONTHS ENDED MARCH 31, 2016 AND 2015**  
**(UNAUDITED)**  
**(EXPRESSED IN CANADIAN DOLLARS)**

**1. Nature of Operations**

Altai Resources Inc. ("Altai" or the "Company"), incorporated under the laws of the province of Ontario, is a resource company with a portfolio of oil revenue producing property and other gas and gold properties which it is in the process of exploring and has not yet determined whether those properties contain reserves that are economically recoverable. All properties are in Canada.

Altai's common shares are listed on the TSX Venture Exchange under the symbol ATI.

These condensed interim consolidated financial statements are unaudited and have been prepared by management with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business. Apart from an oil revenue producing property, the other properties are at an early stage of development. The Company has incurred losses in the past and currently has an accumulated deficit of \$32,784,640.

**2. Basis of Presentation**

**Statement of compliance**

These condensed interim consolidated financial statements are unaudited and have been prepared by management in accordance with the International Financial Reporting Standards ("IFRS") issued by the International Accounting Standards Board ("IASB"). The accounting policies set out below have been applied to all periods presented in these consolidated financial statements.

These condensed interim consolidated financial statements were prepared under IFRS in accordance with IAS 34, *Interim Financial Reporting*. Certain information, in particular the accompanying notes, normally included in the consolidated annual financial statements prepared in accordance with IFRS, have been omitted or condensed. Accordingly, these condensed interim consolidated financial statements do not include all of the information required for full annual financial statements.

The condensed interim consolidated financial statements for the three months ended March 31, 2016 and 2015 were approved by the Board of Directors on May 16, 2016.

**Basis of measurement**

The financial statements have been prepared on the historical cost basis except for financial instruments which are measured at fair value. These condensed interim consolidated financial statements have been prepared using IFRS principles applicable to a going concern, which contemplate the realization of assets and settlement of liabilities in the normal course of business as they come due.

**Functional and presentational currency**

The consolidated financial statements are presented in Canadian dollars, which is the Company's presentation and functional currency.

**Accounting judgments and estimation uncertainty**

The preparation of the financial statements requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Estimates and underlying assumptions are reviewed annually and are based on management's experience and other factors, including expectations of future events that are believed to be reasonable under the circumstances.

In preparing these financial statements, the Company makes judgments regarding the application of its accounting policies.

The financial statement areas that require significant estimates and assumptions are included in the following notes:

**Asset impairments**

For impairment testing of property, plant and equipment and exploration and evaluation assets, the assessment of facts and circumstances is a subjective process that often involves a number of estimates and is subject to interpretation. One of the more significant policies adopted by the Company has been deciding the level at which assets are to be aggregated for assessing impairment. These groupings are referred to as Cash Generating Units ("CGU"). CGU is defined as the lowest levels for which there are separately identifiable independent cash inflows. Based on numerous factors, including the independence of cash inflows and production infrastructure, management

considers the Company to have three CGUs, namely Malartic Gold properties, the Quebec natural gas properties and Cessford oil properties. The testing of assets or CGU's for impairment, as well as the assessment of potential impairment reversals, requires estimates of an asset's or CGU's recoverable amount. The estimate of a recoverable amount requires a number of assumptions and estimates, including quantities of reserves, expected production volumes, future commodity prices, discount rates as well as future development and operating costs. These assumptions and estimates are subject to change as new information becomes available and changes in any of the assumptions, such as a downward revision in reserves, a decrease in commodity prices or an increase in costs, could result in an impairment of an asset's or CGU's carrying value.

Apart from the Sorel-Trois Rivières gas property in Quebec which has been written down at December 31, 2014 as required by accounting standards, at March 31, 2016 management assessed whether there were indicators that the other CGUs may be impaired. Management determined no such indicators are present and therefore no impairment exists.

#### ***Decommissioning liabilities***

Decommissioning liabilities consist of asset retirement obligations that are based, in part, on estimates of future costs to settle the obligation, in addition to estimates of the useful life of the underlying assets, the rate of inflation and the risk-free interest rate. At each reporting date, management reviews the provision for decommissioning liabilities and adjusts it to reflect the current best estimate.

#### ***Depletion, depreciation and amortization***

The Company's property, plant and equipment and exploration and evaluation assets are measured at cost less accumulated depletion, depreciation and amortization (DD&A) and accumulated impairment losses. The amount subject to DD&A is determined as the cost of the asset less its residual value and should be allocated on a systematic basis over the useful life of the assets. The estimate of useful life and residual value are determined annually by qualified independent oil properties specialists. If changed significantly, the changes will be accounted for in the consolidated statements of comprehensive loss prospectively as a change in an accounting estimate in accordance with International Accounting Standards ("IAS") 8 "Accounting Policies, Changes in Accounting Estimates and Errors".

#### ***Valuation allowance for deferred income taxes***

Each period, the Company evaluates the likelihood of whether some portion of each deferred tax asset will not be realized. This evaluation is based on historic and future expected levels of taxable income, the timing of reversals of taxable temporary timing differences that give rise to deferred tax liabilities, tax planning initiative, and deferred tax rates.

#### ***Fair value measurements***

The Company's accounting policies and disclosures require the determination of fair value for both financial and non-financial assets and liabilities. Fair values have been determined for measurement and/or disclosure purposes based on the following methods. When applicable, further information about the assumptions made in determining fair values is disclosed in the notes specific to that asset or liability.

The marketable securities have been designated as available-for-sale and carried at fair value with changes in fair value recognized in other comprehensive income. Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment other than temporary, the amount of the loss is removed from the other comprehensive income and recognized in the statement of comprehensive loss.

The fair value of cash and cash equivalents, accounts receivables, accounts payable and accrued liabilities approximate their carrying value due to their short term to maturity.

The fair value of share-based compensation is estimated using the Black-Scholes Option Pricing valuation model. The inputs are based on factors including the share price on measurement date and the exercise price of the instrument, and based on assumptions for the risk-free interest rate (based on government bonds), the forfeiture rate and expected life of the instruments (based on historical experience and general option holder behavior), expected dividends, and the volatility of the share price (based on historic movements in the Company's share price).

### **3. Summary of Significant Accounting Policies**

The significant accounting policies used in the presentation of these consolidated financial statements are described below:

**Basis of consolidation**

The consolidated financial statements include the accounts of the Company and its wholly-owned subsidiary: Petro St-Pierre Inc. All inter-company accounts and transactions have been eliminated upon consolidation.

**Revenue recognition**

Revenues from the sale of crude oil are recognized when the title and the risks and rewards of ownership pass to the buyer. Revenue is presented net of production expenses and royalties.

Interest income is recorded on an accrual basis. Dividend income is recorded on the ex-dividend date and when the right to receive the dividend has been established.

**Cash and cash equivalents**

Cash and cash equivalents include short term deposits with terms to maturity of ninety days or less when acquired.

**Marketable securities**

Marketable securities are recorded at fair value and are classified as available-for-sale assets. Unrealized gains and losses are recorded in other comprehensive income until the shares are sold or impaired at which time the amounts would be recorded in the consolidated statement of comprehensive income (loss).

**Exploration and evaluation assets**

The exploration and evaluation expenditures include the costs of acquiring licences and claims, exploratory drilling, geological and geophysical activities, acquisition of mineral and surface rights, directly attributable expenses and technical studies. Exploration and evaluation expenditures are capitalized as exploration and evaluation assets when the technical feasibility and commercial viability of extracting mineral and natural gas reserves have yet to be determined. Costs not directly attributable to exploration and evaluation activities, including general and administrative overhead costs, are expensed in the period in which they occur.

Exploration and evaluation assets are measured at cost and are not depleted or depreciated. Exploration and evaluation assets, net of any impairment loss, are transferred to property and equipment when proved and/or probable reserves are determined to exist.

When a project is deemed to no longer have commercial viable prospects to the Company, exploration and evaluation expenditures in respect of that project are deemed to be impaired. As a result, those exploration and evaluation expenditure costs, in excess of estimated recoveries, are written off to profit or loss. The Company assesses exploration and evaluation assets for impairment when facts or circumstances suggest that the carrying amount of an asset may exceed its recoverable amount.

**Property, plant and equipment**

Property, plant and equipment include oil properties, computer equipment, furniture and fixtures and leasehold improvements.

The cost of oil properties include all costs directly associated with the acquisition of crude oil wells and adherent land. These expenditures include its purchase price, legal fees related to the acquisition, and the initial estimate of decommissioning liabilities. The oil properties include four wells and three pieces of adherent land. Since all four wells located within a single geographic unit and have same useful lives and depreciation methods, the four well components have been grouped together as one component. The Company does not currently have a reserve study to allow for depletion based on unit-of-production and therefore depletes the oil property over an estimated useful life using the straight line method.

Property, plant and equipment are stated at cost less accumulated amortization and accumulated impairment. Amortization has been provided in the accounts on the straight line basis at the following rates:

Computer equipment – over 3 years  
Furniture and fixtures – over 5 years  
Oil properties – over 15 years

**Impairment**

The Company assesses assets or groups of assets for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable. If any such indication of impairment exists, the Company makes an estimate of its recoverable amount. The recoverable amount is the higher of its fair value less costs to sell and its value in use. Where the carrying amount of an asset group exceeds its recoverable amount, the asset or asset group is considered impaired and is written down to its recoverable amount. In assessing value in use, the estimated future cash flows are adjusted for the risks specific to the asset or the asset group and are

discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money. An assessment is made at each reporting date as to whether there is any indication that previously recognized impairment may no longer exist or may have decreased. If such indication exists, the recoverable amount is estimated. Any previously recognized loss is reversed only if there has been a change in the estimates used to determine the asset's recoverable amount since the last impairment loss was recognized. If that is the case, the carrying amount of the asset is increased to its recoverable amount. That increased amount cannot exceed the carrying amount that would have been determined, net of depreciation, had no impairment loss been recognized for the asset in prior years. Such reverse is recognized in the consolidated statement of operations. After such reversal, the depreciation charge is adjusted in future periods to allocate the asset's revised carrying amount, less any residual value, on a systematic basis over its remaining useful life.

When an exploration and evaluation asset is determined to be technically feasible and commercially viable, the accumulated costs are transferred to property, plant and equipment. Exploration and evaluation asset and property, plant and equipment are accumulated on an area-by-area basis then grouped into CGU's on the basis of geographical area having regard to the operational infrastructure (such as facilities and sales points) of the area, and are the lowest level at which there are identifiable cash inflows that are largely independent of the cash flows of other groups of assets.

### **Provisions**

Provisions are recorded when a present legal or constructive obligation exists as a result of past events where it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate of the amount of the obligation can be made.

The amount recognized as a provision is the best estimate of the consideration required to settle the present obligation estimated at the end of each reporting period, taking into account the risks and uncertainties surrounding the obligation, its carrying amount is the present value of those cash flows. When some or all of the economic benefits required to settle a provision are expected to be recovered from a third party, the receivable is recognized as an asset if it is virtually certain that reimbursement will be received and the amount receivable can be measured reliably.

### **Decommissioning liabilities**

The Company provides for the costs of decommissioning associated with oil properties, including the abandonment of crude oil wells, related facilities, compressors, removal of equipment from leased acreage and returning such land in a condition as it is contractually obligated. The expected value of each asset's decommissioning liabilities is recorded in the period a well or related asset is drilled and evaluated, constructed or acquired. The decommissioning liabilities are measured in the statement of financial position at the expected value of the expenditures expected to be required to settle the obligation and discounted using a risk free rate. A corresponding amount is capitalized in the relevant asset category. Any further adjustment arising from a reassessment of estimated cost of the decommissioning liabilities or a change in the discount rate also has a corresponding amount capitalized, whilst the charge arising from the accretion of the discount applied to the decommissioning liabilities is treated as a component of finance costs in the consolidated statement of comprehensive income (loss).

### **Fair value of stock options**

The Company uses the Black-Scholes Option Pricing model for valuation of share-based payments. Option pricing models require the input of subjective assumptions including expected share price volatility, interest rate and forfeiture rate. Changes in the input assumptions can materially affect the fair value estimate and the Company's profit and loss and contributed surplus.

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the end of the reporting period. Current tax assets and current tax liabilities are only offset if a legally enforceable right exists to set off the amounts, and the intention is to settle on a net basis, or to realize the asset and settle the liability simultaneously. Current income tax relating to items recognized directly in equity is recognized in equity and not through profit or loss.

### **Income taxes**

Current income tax assets and liabilities for the current and prior periods are measured at the amount expected to be recovered from or paid to the taxation authorities. The tax rates and tax laws used to compute the amount are those that are enacted or substantively enacted by the end of the reporting period. Current tax assets and current tax liabilities are only offset if a legally enforceable right exists to set off the amounts, and the intention is to settle on a net basis, or to realize the asset and settle the liability simultaneously. Current income tax relating to items recognized directly in equity is recognized in equity and not through profit or loss.

Deferred tax is provided using the liability method on temporary differences at the reporting date between the tax bases of assets and

liabilities and their carrying amounts for financial reporting purposes. Deferred tax liabilities are recognized for all taxable temporary differences and deferred tax assets are recognized for all deductible temporary differences, carry-forward of unused tax credits, and unused tax losses, to the extent that it is probable that taxable profit will be available against which the deductible temporary difference and the carry forward of unused tax credits and unused tax losses can be utilized.

Deferred tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realized or the liability is settled, based on tax rates (and tax laws) that have been enacted or substantively enacted at the consolidated statement of financial position date. Deferred tax relating to items recognized directly in equity is also recognized in equity and not in the consolidated statement of comprehensive income (loss).

The carrying amount of deferred tax assets is reviewed at each consolidated statement of financial position date and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow all or part of the deferred tax asset to be utilized. Unrecognized deferred tax assets are reassessed at each consolidated statement of financial position date and are recognized to the extent that it has become probable that future taxable profit will allow the deferred tax asset to be recovered. The Company creates a valuation allowance to the extent that it considers deductible temporary differences, the carry-forward of unused tax credits, and unused tax losses cannot be utilized.

#### **Stock-based compensation cost**

The Company records compensation cost based on the fair value method of accounting for stock-based compensation. The fair value of stock options is determined using the Black-Scholes Option Pricing model. The fair value of the options is recognized over the vesting period as compensation expense and contributed surplus. When options are exercised, the proceeds received, together with any related amount in contributed surplus, will be credited to capital stock.

#### **Loss per common share**

Basic loss per common share is determined by dividing net loss attributable to common shareholders by the weighted average number of common shares outstanding during the period. Diluted loss per common share is calculated in accordance with the treasury stock method and based on the weighted average number of common shares and dilutive common share equivalents outstanding.

#### **Leases**

The determination of whether an arrangement is, or contains, a lease is based on the substance of the arrangement at inception date. It requires consideration as to whether the fulfilment of the arrangement is dependent on the use of a specific tangible asset or the arrangement conveys a right to use the tangible asset.

A lease is classified as an operating lease if it does not transfer substantially all the risks and rewards incidental to ownership. Operating lease payments are recognized as an expense in the consolidated statement of comprehensive income (loss) on a straight-line basis over the lease term.

#### **Financial instruments**

Financial assets and liabilities are recognized when the entity becomes a party to the contractual provisions of the instrument. Upon initial recognition, financial assets and liabilities are measured at fair value plus transaction costs that are directly attributable to the acquisition or issue of the financial asset or financial liability, except for those financial assets and liabilities classified as fair value through profit or loss, which are initially measured at fair value.

#### *Financial assets*

The Company classifies its financial assets into one of the following categories, depending on the purpose for which the asset was acquired. The Company's accounting policy for each category is as follows:

- a) Fair value through profit or loss ("FVTPL") – This category comprises financial assets held for trading and assets designated upon initial recognition as FVTPL. Financial assets held for trading are acquired or incurred principally for the purpose of selling or repurchasing in the near term. On initial recognition it is part of a portfolio of identifiable financial instruments managed together for which there is evidence of a recent pattern of short-term profit taking, or a derivative (excluding a derivative used for hedging). FVTPL are carried in the statement of financial position at fair value with changes in fair value recognized in the statement income (loss) for the period.
- b) Loans and receivables – Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. The Company's accounts receivables are of short term nature and approximate their carrying values and are included in current assets. Loan and receivables are recognized initially at the amount expected to be received, less, when

material, a discount to reduce loans and receivables to fair value. Subsequently, loans and receivable are measured at amortized cost using the effective interest method less a provision for impairment.

The effective interest method is a method of calculating the amortized cost of a financial asset or liability and of allocating interest income or expense over the relevant period.

c) Held-to-maturity investments – Non-derivative financial assets with fixed or determinable payments and fixed maturities that the Company's management has the positive intention and ability to hold to maturity. These assets are measured at amortized costs using the effective interest method. If there is objective evidence that the investment is impaired, the amount of the impairment loss is measured as the difference between the assets' carrying amount and the present value of estimated future cash flows discounted at the entity's original effective interest rate. The impairment losses are recognized in the statement of income (loss).

d) Available-for-sale – Non-derivative financial assets designated as available-for-sale and financial assets that are not classified as loans and receivables, held to maturity investments or FVTPL. Available-for-sale are carried at fair value with changes in fair value recognized in other comprehensive income. Where a decline in the fair value of an available-for-sale financial asset constitutes objective evidence of impairment other than temporary, the amount of the loss is removed from the other comprehensive income and recognized in the statement of income (loss).

All financial assets except for those recorded at fair value through profit or loss and as available-for-sale are subject to review for impairment. Financial assets are impaired when there is any objective evidence that a financial asset or a group of financial assets is impaired.

#### *Financial liabilities*

The Company classifies its financial liabilities into one of two categories depending on the purpose for which the liability was assumed. The Company's accounting policy for each category is as follows:

a) Fair value through profit or loss – This category comprises financial liabilities held for trading and liabilities designated upon initial recognition as FVTPL. FVTPL are carried in the statement of financial position at fair value with changes in fair value recognized in the statement income (loss) for the period.

b) Financial liabilities measured at amortized cost – Financial liabilities measured at amortized cost comprise accounts payable and accrued liabilities. Accounts payable and accrued liabilities are initially recognized at the amount required to be paid, less, when material, a discount to reduce the payables to fair value. Subsequently, trade payables are measured at amortized cost using the effective interest method.

The Company's accounts payables and accrued liabilities and other current liabilities, due to their short term nature and approximation to their carrying values, are classified as current liabilities.

The Company's financial instruments consist of the following:

Instrument	Classification	Measurement basis
Cash and cash equivalents	Fair value through profit or loss	Fair value
Marketable securities	Available-for-sale	Fair value
Accounts receivables	Loans and receivables	Amortized cost
Accounts payable and accrued liabilities	Financial liabilities measured at amortized cost	Amortized cost
Decommissioning liabilities	Financial liabilities measured at amortized cost	Amortized cost

#### *Classification of financial instruments*

IFRS 7 establishes a fair value hierarchy that reflects the significance of inputs in measuring fair value as following:

Level 1 – quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2 – inputs other than quoted prices included in Level 1 that are observable for the asset or liability, either directly (i.e. prices) or

indirectly (i.e. derived from prices); and

Level 3 – inputs for the assets or liability that are not based on observable market data (unobservable inputs).

The classification of a financial instrument in the fair value hierarchy is based upon the lowest level of input that is significant to the measurement of fair value.

The Company's cash and cash equivalents and marketable securities are designated as Level 1.

The fair value of cash and cash equivalents, marketable securities, accounts receivable, and accounts payable and accrued liabilities approximate their carrying values due to their short term nature. Decommissioning liabilities have been recorded at its present value.

#### *Offsetting of financial instruments*

Financial assets and financial liabilities are offset and the net amount is reported in the consolidated statement of financial position if, and only if, there is a currently enforceable legal right to offset the recognized amounts and there is an intention to settle on a net basis, or to realize the assets and settle the liabilities simultaneously.

#### **Accounting policy implemented on January 1, 2016**

The Company has implemented on January 1, 2016 the amendments to IFRS 11 *Joint Arrangements*, which require business combination accounting to be applied to acquisitions of interests in a joint operation that constitute a business. The amendments do not have any impact on the Company's financial results and financial statements.

#### **Future changes in accounting policies**

IFRS 15 *Revenue from Contracts with Customers*, was issued in May 2014 and replaces the previous guidance on revenue recognition. The standard is effective for annual periods beginning on or after January 1, 2018, with earlier application permitted. The standard provides a single, principles based on five step model to be applied to all contracts with customers. The Company is currently evaluating the impact of the adoption of this new standard on its financial statements.

#### **4. Marketable Securities**

The available-for-sale marketable securities consist of dividend/interest paying Canadian financial and utilities shares and shares of junior resource companies the Company received pursuant to option agreements. They are reported in their fair market values at the end of the reporting periods. The unrealized gain (the total fair market values less the total costs) is included in other comprehensive income.

Total fair market values and costs of the available-for-sale marketable securities at March 31, 2016 and 2015 are as follows:

	2016	2015
<b>Total fair market values</b>	\$1,965,719	\$1,981,422
<b>Total costs</b>	\$1,350,532	\$1,402,139

As at March 31, 2016, the Company has unrealized gain of \$615,187 (2015 – \$579,283) net of taxes of \$81,512 (2015 - \$76,755).

#### **5. Exploration and Evaluation Assets**

Exploration and evaluation assets consist of the interest in mining properties and natural gas interests.

	Interests in mining properties (i)	Natural gas interests (ii)	Total
<b>Balance at December 31, 2014 and 2015, and March 31, 2016</b>	863,890	1	863,891

##### **i) Interests in mining properties**

Malartic Township gold property, Quebec	Acquisition cost	Expenditure	Total
<b>Balance at December 31, 2014, March 31, 2015, December 31, 2015 and March 31, 2016</b>	\$123,711	\$740,179	\$863,890

The Company owns 50% working interest in the Malartic Township gold property of three mining claims totalling 120 hectares (300 acres) in Quebec. On October 14, 2014, the Ministry of Natural Resources converted and registered the claims into and as six new map designated claims (CDC) totalling 127.6 hectares (315 acres). The other 50% working interest is owned by the property joint-venture partner and operator, Globex Mining Enterprises Inc., which names the project "Blackcliff gold property".

## ii) Natural gas interests

### Sorel-Trois Rivières natural gas property, Quebec

As at March 31, 2016, Altai holds 100% interest in five oil and gas and reservoir permits in the Sorel-Trois Rivières area, St. Lawrence Lowlands covering 68,483 hectares (169,221 acres).

The Company also has 15% gross royalty on all net receipts from an adjacent permit (and its successor permit) of 13,290 hectares (32,840 acres) that Talisman Energy Canada (now Repsol Canada Energy Partnership) has 100% working interest. That permit has been reduced to 12,334 hectares (30,477 acres) due to Bill 18 in Quebec.

The Company considers that the property is still a promising project for the future, but because of the socio-economic climate related to this project, it recognizes that recovery of its investments in the project in the near term is unlikely. In view of the prolonged delay in the formation of a new energy policy since 2011 resulting in the uncertainty in the future Quebec shale gas development, the Company adopted a prudent approach and wrote down the project to \$1 as required by accounting standards, at December 31, 2014.

Thereafter all exploration expenditures on the property are reported in the profit and loss. Total cumulative capital and exploration expenditures (including expenditures reported in the profit and loss) incurred on the natural gas interests to March 31, 2016 amounted to \$24,610,134 (2015-\$24,603,109), with total cumulative write downs (including expenditures reported in the profit and loss) of \$24,610,133 (2015-\$24,603,108).

The impairment of exploration and evaluation assets recognized can be reversed in the coming years (in whole or in part), if there is any indication that the impairment loss recognized may no longer exist and that the recoverable amount of impaired assets exceeds its carrying amount. The value of the impaired assets will be re-evaluated when details for the various issues in the April 2016 Energy Policy are available in the future.

## 6. Property and Equipment

	March 31, 2016			March 31, 2015		
	Cost	Accumulated Amortization	Net	Cost	Accumulated amortization	Net
Computer equipment	\$ 24,577	\$ 24,062	\$ 515	\$ 24,577	\$ 23,233	\$ 1,344
Furniture and fixtures	4,303	4,303	—	4,303	4,049	254
Oil properties (1)	892,190	215,504	676,686	876,926	155,281	721,645
	\$921,070	\$243,869	\$677,201	\$905,806	\$182,563	\$723,243

- (1) In 2012, the Company acquired a 50% (net 45%) working interest in 240 acres of Alberta Crown leases in the Cessford area of central Alberta and production of light oil in four long-life oil producing wells. The cost of oil properties include all costs directly associated with the acquisition of crude oil and adherent land. These expenditures include its purchase price, legal fee related to acquisition, and the decommissioning liabilities. 692012 Alberta Ltd. and another Calgary party which provided technical support to Altai during the acquisition process, were paid a fee in kind by Altai, that is, each of the two parties held a 2.5% working interest in the property on the transaction closing. ConocoPhillips Canada Energy Partnership ("Conoco") of ConocoPhillips Canada Resources Corp., a fully owned subsidiary of ConocoPhillips, US, was the partner and operator of the property. In November 2015, Conoco assigned its interest in the property to Canadian Natural Resources Limited which becomes the partner and operator of the property.

The four wells are subject to various royalty payments, some of which are 1.25-3% of gross revenue on certain wells and another which is based on barrels of oil produced. Reserve life of the four wells is estimated at 15 years. There have been no reserve studies performed to accurately estimate the reserves of these properties.

## 7. Decommissioning Liabilities

The decommissioning liability was estimated based on the Company's net ownership interest in all wells and facilities, the estimated cost to abandon and reclaim the wells and facilities and the estimated timing of the costs to be incurred in future periods. By their nature, these estimates are subject to measurement uncertainty and the effect on the financial statement could be significant. The total undiscounted amount of the estimated cash flows required to settle the asset retirement obligation is approximately \$121,000 (March 31, 2015 – \$121,000) which will be incurred in 12 years. A nominal risk free rate of 2.15% (March 31, 2015 – 3.24%), and an inflation rate of 1.9% (March 31, 2015 – 2%), was used to calculate the fair value of the asset retirement obligation. Changes to the liability were as follows:

<b>Balance at December 31, 2014</b>	<b>\$109,941</b>
Accretion	1,022
<b>Balance at March 31, 2015</b>	<b>\$110,963</b>
Change in discount rate	15,264
Accretion	1,814
<b>Balance at December 31, 2015</b>	<b>\$128,041</b>
Accretion	709
<b>Balance at March 31, 2016</b>	<b>\$128,750</b>

## 8. Income Taxes

Future income tax liabilities as at March 31, 2016 and 2015 are:-

	<b>2016</b>	<b>2015</b>
Marketable securities –unrealized gains	\$81,512	\$76,755

## 9. Share Capital

### a) Share capital

#### Authorized

An unlimited number of common shares of no par value.

<b>Issued and outstanding common shares</b>	<b>No. of shares</b>	<b>Amount</b>
<b>Balance at December 31, 2014, March 31, 2015, December 31, 2015 and March 31, 2016</b>	<b>55,113,552</b>	<b>\$36,627,178</b>

#### Reduction of Stated Capital and Special Distribution

At the general and special meeting of the shareholders held on July 16, 2015, the shareholders approved a special resolution authorizing the Board of Directors of the Company to determine at its own discretion to reduce the stated capital of the common shares of the Company and to make the associated special distribution(s) in an aggregate amount to be determined by the Board up to a maximum accumulative total of \$4,500,000. As at March 31, 2016, no such distribution had been made.

Please see Note 17(b) – Subsequent Events for cash distribution as return of capital of \$0.05 per common share declared on April 15, 2016.

#### Shareholder Rights Plan

At a special meeting of the shareholders on November 12, 2013, the shareholders ratified and approved a Shareholder Rights Plan (the "Rights Plan") which was adopted by the Board of Directors on August 28, 2013 pursuant to the Rights Plan Agreement of August 28, 2013. The Rights Plan will be in effect for three years.

The Rights Plan is designed to provide the Board sufficient time to consider and evaluate any unsolicited take-over bid for the Company's common shares and if considered appropriate, seek, develop and pursue alternatives to maximize value for shareholders, encourage the equal treatment of shareholders in connection with any take-over offer, give adequate time for shareholders to properly assess a take-over bid without undue pressure, and generally to prevent any person from acquiring ownership of or the right to vote on 20% or more of Altai common shares while the process undertaken by the Board of Directors is ongoing.

The Rights Plan provides that one right would be issued to each issued and outstanding common share of the Company as of the effective date of the Rights Agreement and to each common share issued after the Rights Agreement effective date and prior to the separation time. A rights certificate will not be issued until the rights become exercisable after the separation time. If a person acquires common shares in breach of the Rights Plan, each right held by a shareholder, other than the acquiring person and its affiliates, associates and joint actors, will upon exercise and payment of the exercise price, entitle the right holder to purchase that number of common shares from the Company having an aggregate market price equal to twice the exercise price of the rights.

The Rights Plan provides for permitted bids, which among other things, must be made by way of a take-over bid circular to all shareholders of Altai, is for all of the outstanding common share, has a minimum offering period of 60 days, and only if more than 50% of the outstanding voting shares held by all shareholders other than the bidder and any of its affiliates, associates and joint actors, have been deposited or tendered to the bid and not withdrawn.

**b) Share purchase warrants**

There is no share purchase warrants outstanding at December 21, 2014 through to March 31, 2016 and to date.

**c) Stock options**

The 2010 Stock Option Plan permits the grant of up to 4,950,000 option shares to directors, officers and employees of the Company or of its subsidiaries. Options granted are generally exercisable for up to five years from the date of grant.

The prices of all stock options granted are greater than or equal to the closing fair market value of each common share on the days prior to the options being granted.

At March 31, 2016, there were 3,750,000 option shares available for future grants.

During the period ended March 31, 2016, the Company did not grant any stock options.

A summary of the status of the Company's stock options as at March 31, 2016 and 2015 and changes during the years then ended is presented below:

	2016		2015	
Stock options	No. of options	Weighted average exercise price	No. of options	Weighted average exercise price
Outstanding at beginning of period	1,200,000	\$0.100	1,600,000	\$0.365
Options expired without being exercised	—	—	(200,000)	0.460
Outstanding and exercisable at end of period	1,200,000	\$0.100	1,400,000	\$0.129

The following table summarizes information on outstanding and exercisable stock options as at March 31, 2016:

Number of options outstanding and exercisable	Exercise price	Remaining contractual life (years)	Expiry date
800,000	\$0.100	1.23	June 21, 2017
400,000	0.100	2.27	July 9, 2018
1,200,000	\$0.100	1.58	

**10. Loss Per Share**

The following table sets forth the computation of basic and diluted loss per share for the periods ended March 31, 2016 and 2015:

	2016	2015
Net loss for the period	\$(22,118)	\$(2,055)
Weighted average number of shares – basic and diluted	55,113,552	55,113,552
Basic and diluted net loss per share (1)	\$(0.00)	\$(0.00)

(1) Due to the loss in the periods of 2016 and 2015, the diluted weighted average number of shares used to calculate the diluted net loss per share is the same as the basic weighted average number of shares as the inclusion of dilutive shares would be anti-dilutive.

**11. Related Party Transactions**

Consulting services were provided by management personnel who are officers of the Company and companies owned by officers of the Company. The directors of the Company did not receive any cash compensation in their capacity as directors during the three months ended March 31, 2016 and 2015. The remuneration of directors and officers of the Company for the three months ended March 31, 2016 and 2015 are as follows:

	2016			2015		
	Cash compensation	Fair value of stock-based compensation	Total compensation	Cash compensation	Fair value of stock based compensation	Total compensation
Directors	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0	\$ 0

<b>Officers</b>						
Niyazi Kacira – Chairman and President	0 (1)	0	0	0	0	0
Maria Au – Secretary-Treasurer	13,500	0	13,500	13,500	0	13,500
	\$13,500 (2)	\$ 0	\$13,500	\$13,500	\$ 0	\$13,500
<b>Total – Directors and Officers</b>	\$13,500	\$ 0	\$13,500	\$13,500	\$ 0	\$13,500

(1) Niyazi Kacira, Chairman and President of the Company, voluntarily offered to provide his professional services to the Company without any cash compensation effective January 1, 2015, to help the Company to reduce its expenses.

(2) These fees have been allocated all to administrative expenses (2015 - \$13,500).

The Company did not pay any other benefits, apart from the compensation reported above, to the directors and officers during the three months ended March 31, 2016 and 2015.

## 12. Key Management Personnel Compensation

The Company recognized the professional fees of \$13,500 for its key management personnel for the three months ended March 31, 2016 (2015 - \$13,500).

## 13. Commitments

a) The Company's Toronto office extended its office lease by one year to expire at the end of June 2016. The basic rent is \$1,218 per month. The total rent payment for 2016 is approximately \$7,308.

b) In October 2010 the Company signed agreements to pay \$50,000 and \$16,000 as termination fees to Maria Au, an officer of the Company, and a staff of Altai, respectively, when their service to the Company terminates in the future.

c) The Company is committed to certain royalty payments on its oil production assets, the cost of which cannot be reasonably estimated.

## 14. Financial Instruments Hierarchy

The following table presents the Company's financial instruments, measured at fair value on the consolidated statements of financial position as at March 31, 2016 categorized into levels of the fair value hierarchy in accordance with IFRS 7:

	Level 1 Quoted market price	Level 2 Valuation technique - observable market inputs	Level 3 Valuation technique -non-observable market inputs	Total
<b>Financial assets</b>				
<b>Fair value through profit or loss</b>				
Cash and cash equivalents	\$4,224,528	–	–	\$4,140,591
<b>Available-for-sale</b>				
Marketable securities	1,965,719	–	–	1,981,422
Total	\$6,190,247			\$6,122,013

There was no transfer from Level 1 to 2 or Level 2 to 1 during the three months ended March 31, 2016 and 2015.

## 15. Management of Capital

The Company includes the following in its capital as at March 31, 2016 and 2015:

	2016	2015
<b>Shareholders' equity comprised of</b>		
Share capital	\$36,627,178	\$36,627,178
Contributed surplus	3,159,111	3,159,111
Deficit	(32,784,640)	(32,730,030)
Accumulated other comprehensive income	513,446	482,300
	\$7,515,095	\$7,538,559

The Company's objectives when managing capital are:

- (a) to ensure that the Company maintains the level of capital necessary to meet the requirements of its exploration programs and current operating expenditures;
- (b) to allow the Company to respond to changes in economic and/or marketplace conditions;
- (c) to give shareholders sustained growth in shareholder value by increasing shareholders' equity; and
- (d) to maintain a flexible capital structure which optimizes the cost of capital at acceptable levels of risk.

The Company manages its capital structure and makes adjustments to it in the light of changes in economic conditions and the risk characteristics of its underlying assets. The Company maintains or adjusts its capital level to enable it to meet its objectives by:

- (a) realizing proceeds from the disposition of its investments; and
- (b) raising capital through equity financings.

The Company is not subject to any capital requirements imposed by a regulator.

The payment of cash dividends does not form part of Altai's current capital management program and, to date, the Company has not declared any cash dividends on its shares. The Company's management is responsible for the management of capital. The Company expects that its current capital resources will be sufficient to discharge its liabilities for the next 12 months.

## 16. Financial Instruments

The Company has designated its cash and cash equivalents as fair value through profit or loss and marketable securities as available-for-sale, both of which are measured at fair value. Accounts receivable is classified as loans and receivable, which is measured at amortized cost. Accounts payable and accrued liabilities are classified as financial liabilities measured at amortized cost.

The Company is exposed in varying degrees to a number of risks arising from financial instruments. The Board of Directors has overall responsibility for the establishment and oversight of the Company's risk management framework. Management's close involvement in the operations allows for the identification of risks and variances from expectations. The Board approves and monitors the risk management process.

The types of risk exposure and the way in which such exposures are managed as follows:

(a) Credit risk

Credit risk is the risk of financial loss to the Company if counterparty to a financial instrument fails to meet its payment obligations. The Company's exposure to credit risk includes cash and cash equivalents and marketable securities. The risk exposure is limited to their carrying amounts at the date of the financial position statement.

Cash and cash equivalents are maintained with financial institutions. The risk is mitigated because the financial institutions are major institutions with high credit ratings. The marketable securities are mainly very liquid securities that are reflected at market value.

(b) Liquidity risk

Liquidity risk is the risk that the Company will not be able to meet its financial obligations as they become due. The Company manages its liquidity risk by actively forecasting, planning, reviewing and monitoring expenditures and commitments and anticipated financial requirements.

Cash and cash equivalents on hand at March 31, 2016 and to date are expected to be sufficient to fund the Company's ongoing operational needs for the next 12 months.

(c) Market risk

Market risk is the risk that changes in market prices, such as natural gas and mineral prices, foreign exchange rates and interest rates will affect the Company's income. The object of market risk management is to manage and control market risk exposures within acceptable parameters, while optimizing the return on risk.

1) Commodity risk

The ability of the Company to develop its properties and the future profitability of the Company is directly related to the market price of certain minerals and oil and gas prices. The Company does not use derivative financial instruments to reduce its exposure to commodity price risk.

2) Currency risk

The Company is not exposed to the financial risk related to the fluctuation of foreign exchange rates. The Company operates mainly in Canada and all of its expenses are incurred in Canadian dollars.

3) Interest rate risk

The Company is not exposed to significant interest rate risks since all of its financial instruments can be quickly turned into cash, thus avoiding additional risks.

## 17. Subsequent Events

a) In April 2016 the Company has extended its Toronto office lease by one year expiring at the end of June 2017. The basic rent is \$1,248 per month.

b) On April 15, 2016 the Board of Directors approved a special cash distribution by way of a return of capital on the common shares of the Company of \$0.05 per common share (the "Cash Distribution"). The special resolution on reduction of stated capital and cash distribution(s) approved by shareholders at the July 16, 2015 shareholders meeting allows the Board to approve the Cash Distribution by way of a return of capital.

The aggregate amount of the Cash Distribution will be approximately \$2.76 million. It will be funded from Altai's cash reserves.

The Cash Distribution to shareholders will be made in accordance with the "due bill" trading procedures mandated by the TSX Venture Exchange ("TSXV") for distribution or dividend the amount per share of which exceeds 25% of the share trading price on the declaration date. The purpose is to result in traded shares carrying the value of the \$0.05 distribution until it is paid.

Key dates for the Cash Distribution are:

- The Record Date to determine shareholders entitled to receive the Cash Distribution : May 18, 2016 ("Distribution Record Date")
- The Payment Date for the Cash Distribution : June 9, 2016 (the "Payment Date")
- Due Bill Trading Period : May 16, 2016 to June 9, 2016 inclusively. In accordance with the applicable rules of the TSXV, the "due bill" trading procedures of the TSXV will apply to the Cash Distribution. The common shares will trade on a "due bill" basis from two trading days prior to the Distribution Record Date to the Payment Date, inclusively (the "due bill period"). Any trades that are executed during the due bill period will be identified to ensure purchasers of the common shares receive the entitlement to the respective distribution.
- The Ex-distribution Date : June 10, 2016. The common shares will commence trading on an ex-distribution basis on June 10, 2016, as of which date purchases of the common shares will no longer have an attaching entitlement to the distribution.
- The Due Bill Redemption Date : June 14, 2016 (two trading days after the Ex-distribution Date)
